## **Nissens® Releases 868 New Numbers, Introduces A/C Hose Assemblies**

Horsens, Denmark, June 25, 2025 – Nissens Automotive is proud to announce the release of 868 new part numbers exclusive to its North American product portfolio. This release includes A/C Service Kits, Compressors, and more, along with the introduction of Hose Assemblies to its expanding lineup. The expansion, focused largely on increasing coverage of Asian vehicles, demonstrates Nissens' focus on growing its product portfolio for the North American aftermarket.

A total of 98 A/C System Service Kits were added to Nissens' growing program, covering over 58 million vehicles. These time-saving Kits include vehicle-specific compressor oil, measuring cup, an accumulator, or receiver drier, an orifice tube or expansion valve, and all necessary O-rings, seals, gaskets, caps and valve cores for a complete A/C system service.

Nissens' A/C Compressor program is growing substantially with the introduction of 173 new numbers, adding coverage for over 46 million vehicles. In addition, 128 A/C Evaporator Cores were added, covering over 104 million import vehicles. The Nissens HVAC Blower Motor Assembly program also grew with the introduction of 121 new numbers covering 119 million vehicles. Additional categories that see expansion include Condenser Fan Assemblies, Expansion Valves, Receiver Driers, Dual Radiator and Condenser Fan Assemblies, Engine Cooling Fan Assemblies, Engine Auxiliary Water Pumps, and Engine Cooling Fan Clutches.

Nissens also introduced a new line of A/C System Hose Assemblies, which include Refrigerant Discharge, Liquid and Suction Hoses, as well as Suction and Liquid Line Hose Assemblies. The initial offering of 100 hoses covers 77 million vehicles, including popular import makes such as Honda, Toyota, Lexus and Infiniti. All Hoses are made with a double-wall barrier hose and are compatible with all automotive refrigerants. They are also tested and inspected to ensure leak-free performance, and all necessary O-rings, seals, valve cores and caps are included for a complete installation.

Jeff Hansen, President of Nissens North America, stated, "We are proud to expand our North American product offering by nearly 900 numbers, strategically adding to key categories with a focus on popular Asian vehicles. This expansion significantly broadens our coverage in existing categories and further expands our programs with the launch of A/C Hose Assemblies."
