## **Standard Motor Products, Inc. Releases New TechSmart® Expansion Tank Service Kit Tech Session Video**

**New York, N.Y., July 22, 2013** – Standard Motor Products, Inc. (NYSE: SMP) has released a new TechSmart® Tech Session that features the TechSmart line of expansion tank service kits, providing useful information for this growing product category. The new video, as well as the entire Tech Session video series, is available for viewing at [www.youtube.com/TechSmartParts](http://www.youtube.com/TechSmartParts) and [www.facebook.com/TechSmartParts](http://www.facebook.com/TechSmartParts) by clicking on the video channel button.

The OE designed expansion tank system can fail over time, leaking coolant and increasing the risk of over-heating. The thermostat located on the oil cooler is often damaged while removing the expansion tank. TechSmart Expansion Tank Service Kits provide the expansion tank, oil cooler thermostat and coolant level sensor to replace the damaged unit and restore the vehicle's proper cooling functions.

"We currently offer twenty-five premium TechSmart expansion tank service kits for the most popular European applications," said Phil Hutchens, Vice President Engine Management Marketing, SMP. "These kits contain everything a technician will need to do the job right."

Tech Sessions are designed to help professional technicians find new and better ways to solve their automotive repair issues. Videos are also available for TechSmart electronic throttle bodies, PMD relocation kit, steering column shift tubes, air door actuators and the VVT chain tensioner.

The TechSmart line of enhanced engine control parts are designed to meet the needs of today's professional service technicians by providing them with high-quality, hard-to-find, problem-solving parts featuring new categories and new technology that they can trust. For additional information on TechSmart, contact an SMP sales representative or visit [www.TechSmartParts.com](http://www.TechSmartParts.com).

### **About SMP:**

SMP supplies independent professional auto technicians and automotive do-it-yourselfers with high quality replacement parts for engine management ignition, emission and fuel systems as well as temperature control products for domestic and import cars and light trucks. SMP products are sold through both traditional and non-traditional distribution channels. For more information, visit [www.smpcorp.com](http://www.smpcorp.com).
