Standard Motor Products Announces New Numbers in 31 Categories

NEW YORK, N.Y., October 3, 2025 – Standard Motor Products, Inc. (SMP) is pleased to announce that it released more than 250 new part numbers across 31 product categories in Q3 of 2025. This includes new applications from SMP's Vehicle Control and Temperature Control divisions for late-model import and domestic vehicles.

Standard® has recently added new numbers to its Undercar, Turbocharging, Fuel Injection, and Closure System Programs, demonstrating its ongoing commitment to late-model coverage in vehicle control categories. More than twenty ABS Speed Sensors have been added covering millions of popular import and domestic vehicles like the 2025-21 Toyota Sienna, 2025-21 Ford Mustang Mach-E, and 2024-18 Chevrolet Equinox. Multiple Power Door Lock Actuators have also been added for popular vehicles like the 2025-20 Nissan Sentra, and Hood Latch Assemblies are new for the 2024-22 Jeep Grand Cherokee. In addition, New Gas Turbocharger Kits have been introduced for Subaru vehicles through 2021, and Direct Injection High-Pressure Fuel Pumps are now available for nearly a half million Audi and Volkswagen vehicles. Additional Standard® categories that see expansion include Accelerator Pedal Sensors, Automatic Transmission Oil Coolers, Trunk Lock Actuator Motors, Vehicle Speed Sensors and more.

Four Seasons® Air Door Actuators have been released for millions of late-model vehicles like the 2022-16 Honda HR-V and 2019-15 Hyundai Sonata. New and Remanufactured AC Compressors have also been added covering millions of RAM, Ford, Kia, and Hyundai vehicles, and new Blower Motor Resistors are also available for popular import and domestic vehicles. New to the Four Seasons® product offering are Coolant Filters, which are designed to remove harmful particulates from the system before they reach critical components, helping to extend heater core life and improve system reliability. The easy-to-install upgrade is available in two sizes to fit most vehicle applications. Additional Four Seasons® categories that saw growth include Hose Assemblies, Electric Coolant Pumps, Heater Cores, Expansion Valves and more.

Jack Ramsey, Senior Vice President of Sales and Marketing, SMP, stated, "The third quarter of the year saw the expansion of many of our most popular categories, adding coverage for millions of vehicles. This new coverage is evidence of our continuing commitment to delivering the late-model coverage technicians have come to expect from both Standard® and Four Seasons®.

All new applications are listed in the catalogs found at StandardBrand.com and 4S.com, and in electronic catalog providers.

About SMP

With over 100 years in business, Standard Motor Products, Inc. is a leading independent manufacturer and distributor of premium replacement parts in the automotive aftermarket and a custom-engineered solutions provider to vehicle and equipment manufacturers in diverse non-aftermarket end markets. SMP sells its products primarily to retailers, warehouse distributors, original equipment manufacturers and original equipment service part operations in the United States, Canada, Europe, Asia, Mexico and other Latin America countries.
